

What you are about to find out

These slides explain in a nutshell the high likelihood of the nature of the target you are dealing with in chronic diseases.

The one-therapy-one-dysfunction approach does not apply to chronic diseases as you will soon find out why. Nevertheless, there are many sufferers of chronic diseases who keep on trying various methods to no avail and this can be attributed to the reason that these sufferers DO NOT know what they are dealing with.

You have to suspect the nature of the target you are dealing with in causing chronic diseases; all because chronic diseases are actually “One Disease Many Names” or “One Infection, Many Afflictions”. Keep this in mind.

You need to free your mind from the standard verbiage about chronic diseases and study it in a new light. It has been found that the treatment for chronic diseases show more success if they are treated in the same way *Candidiasis* is being treated. You will understand why as you read on.

At the moment don't worry too much about what Candidiasis is all about. There are tons of knowledge base on this topic in reputable internet sites. Now, please flip through the pages of this presentation....

Don't give up yet...

There is a school of medical thought which says chronic diseases have to be treated in a timely way and the failure of any particular treatment is partly attributed to the sufferers seeking help too late or had 'wasted' much time using home-remedies.

The above cannot be true as we had found chronic disease sufferers who had sought standard treatment after being diagnosed with their problem, and who had been 'proclaimed' by mainstream medicine as 'terminal', 'hopeless' or 'suffer for their remaining life' and yet 'miraculously' reversed or solved their problem using methods which can be explained in this presentation as to why these method are effective.

There is a gaping hole in the understanding of chronic diseases

As we have said, we have indirectly or directly encountered cases of reversal of chronic diseases which have, at the center of the episode, remedies which include the following but not limited to:

- Balancing the electrolyte in the human body
- Balancing the ecological flora in the intestinal system
- Infusing the body heavy with of fresh raw edible phyto-nutrients
- Fighting pathogenic fungi other than bacteria, viruses and other parasites/pathogens
- Clearing the body of toxins
- Infusing the body with 'therapeutic' edible oils
- Using hyperbaric oxygen treatment

The question: Why do all the above methods work?

WHY?

People don't usually suffer from just one chronic disease.

The fact is people usually SUFFER from MULTIPLE CHRONIC DISEASES at any one time if at all they are afflicted with chronic disease.

WHY???

**Chronic disease sufferers
don't seem to benefit from
Western Medical Science
with its advanced scientific
discoveries, research, reductionist
theories, anti-oxidants,
super+hyper bio-actives, etc?**

WHY??

**Most chronic disease sufferers
don't seem to benefit from
ancient, thousands of years old,
documented, proven, tested
Traditional Chinese Medicine,
Oriental Medicine, Ayurvedic
Science, Folk Medicine, etc.?**

WHY??

Health-conscious people who are determined in physical exercises, knowledgeable in health matters, having-one-meal-a-day can still be struck down by chronic diseases?

ANSWER

The reason to the Why's:

**A long neglected, forgotten,
hardly-discussed, 'hidden' reality:**

**THE POWER OF A CLASS OF
PATHOGEN grouped under
FUNGI.**

Fungi is not only the scourge of women's gynaecological problems.

Fungal toxins are not only from food turned bad or fungus-infested crops.

INTERNAL PATHOGENIC FUNGI is highly likely the prime intervening force of the human physiological processes leading to stubborn chronic diseases.

Too much attention has been given to pathogenic bacteria and pathogenic viruses; when actually the power of pathogenic fungi has also to be taken into consideration.

Fungi have far more superior covert, defence, offence, dormancy, survival, disguise, and 'chameleon' tactics and weaponry than those of bacteria and viruses put together.

The high toxicity of fungal toxins from pathogenic and toxigenic fungi have actually be documented in history.

One family fungi such as *Candida* is able to produce at least 40 types of fungal toxins which adversely impact blood vessels, muscles, bones, brain, systemic processes and physiological organs.

**Because of the superior tactics
and strategies of pathogenic
fungi, we experience:**

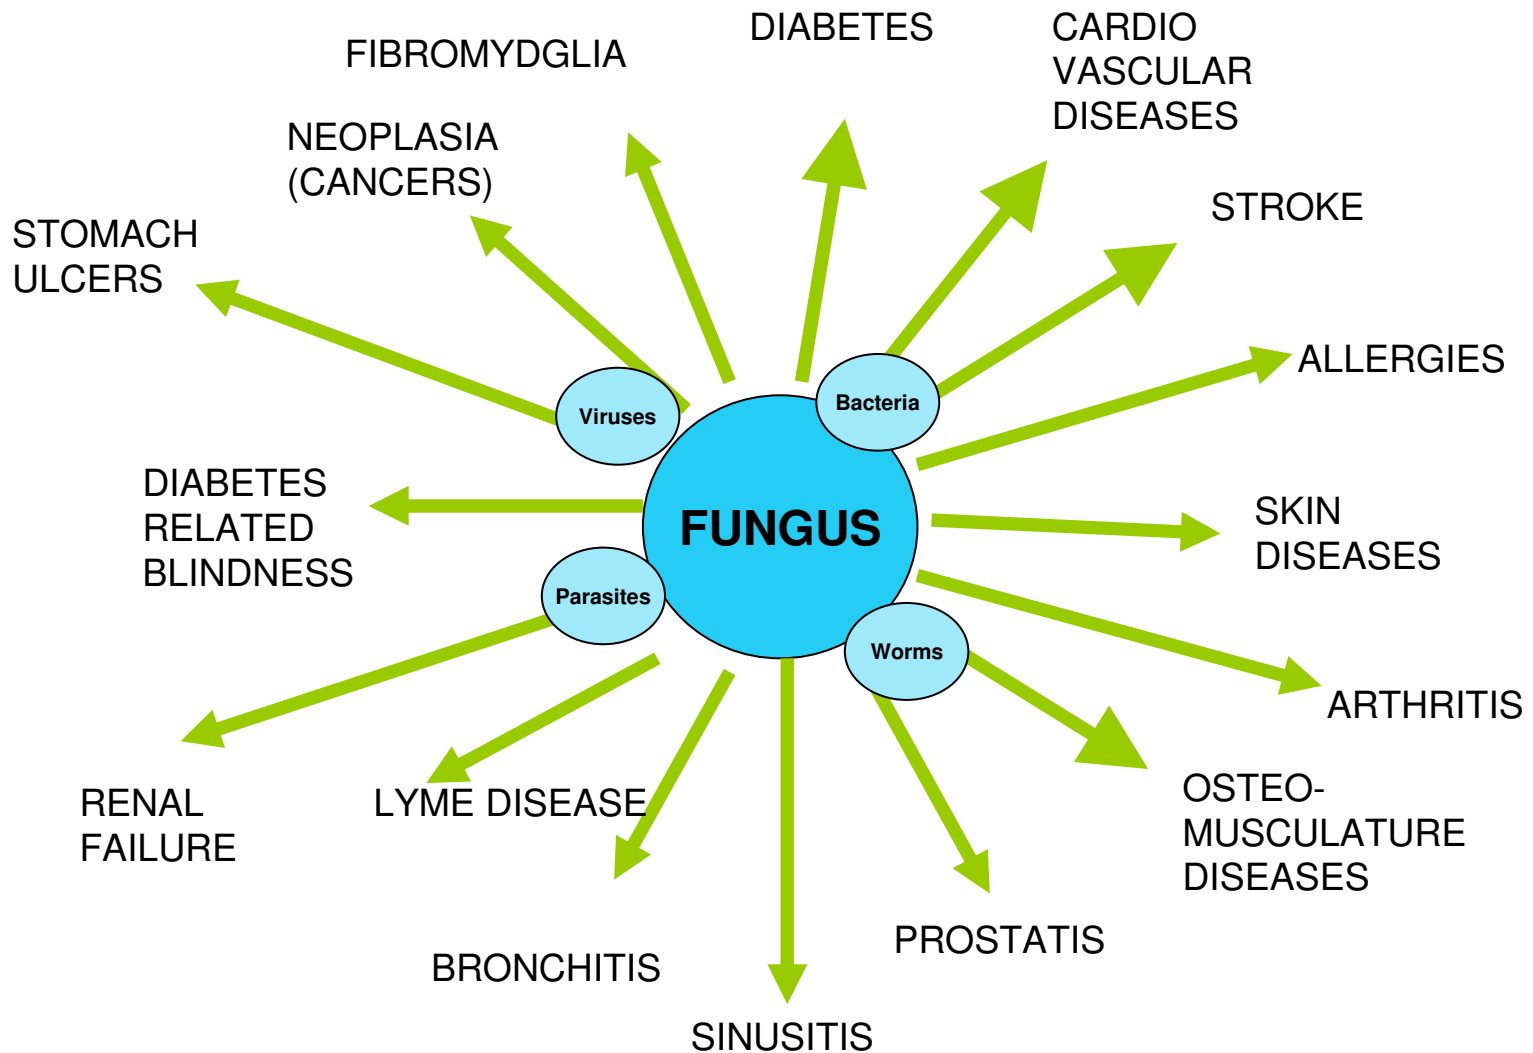

ONE DISEASE

MANY NAMES

or D.E.A.T.H.

***(Degenerative Early Attack on
Total Health)***

The diversity of chronic diseases has a characterisation similar to the diverse morphology of pathogenic fungi

How to solve chronic diseases?

**ONE SOLUTION:
CONTROL FUNGAL
POPULATION**

There is no lack of solution

ONE SOLUTION

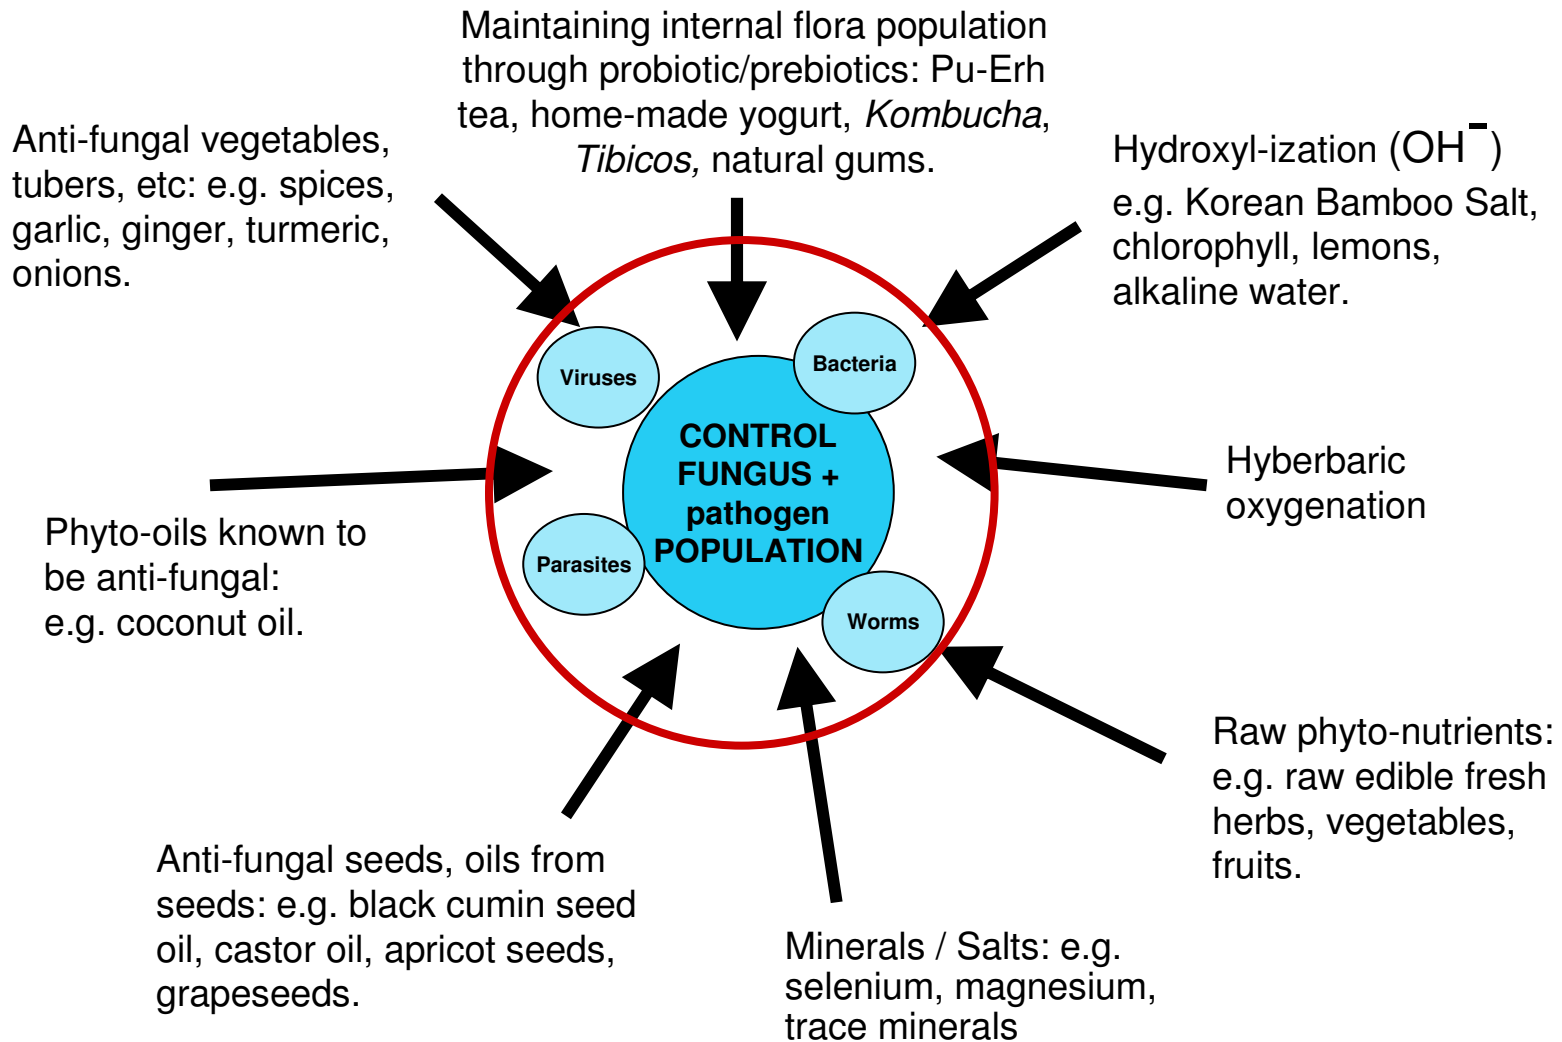

MANY WAYS:

**There are hundreds,
if not thousands, of
ways.**

FOOD AS MEDICINE

MEDICINE AS FOOD

CHRONIC DISEASE CONTROL: ONE SOLUTION, MANY WAYS

Know the key characteristics of pathogenic fungi

- Survive well in non-oxygenated environment.
- Multiplies well in a hydrogenated (H⁺) environment.
- Produce toxins which affect cranial-neurological network and cause gustatory (tongue) and mind control.
- Produce toxins which cause 'healing crisis'.
- Stubborn and have superior survival techniques.
- Digest and cannibalize not only sugars, but also hormones, enzymes, blood, and just about anything organic in the human body.

THE TRUTH OF HEALTH

The human body can only respond well to standard medicinal protocols *(whether Western, Chinese, Oriental, Ayurvedic, etc.)*

IF AND ONLY IF pathogenic toxins are negated and the interference of pathogenic fungi is continuously controlled to a minimum.
